Even the simplest information technology work requires patience and a set of skills that need constantly updating to keep up with the latest software features or cybersecurity threat. Which is why employers don't just want blank slates operating their IT desks, they need dedicated workers who enter the fray fully trained—with certifications.

Those certifications can change based on what kind of hardware and network your employer uses, so it's important to keep your resumé diverse. And, since those certification exams cost money, you don't want to take them more often than needed. Enter [The Complete 2022 IT Career Kickstarter Bundle](#)—a great way to tackle crucial tests the right way the first time.

All six courses are taught by experienced educators at iCollege, whose aim is to cover everything you need to know for the most popular IT certification exams. And with more than 165 hours of lectures and exercises, you'll feel fully prepped by the end.

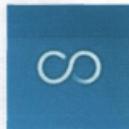

For those eyeing a CompTIA network, there's extensive training for Fundamentals+, A+, and Network+ exams. Perhaps you plan to take the Cisco path, with a CCT exam on routing and switching; or focus on specific operating systems with courses on MacOS or Windows 10. With these certifications under your belt, you can take your pick of IT jobs, from maintenance worker to systems admin.

PCMag readers can start learning today with [The Complete 2022 IT Career Kickstarter Bundle](#), on sale for \$59—96% off the \$1,770 MSRP.

Prices subject to change.
